

The objective of the Quality Policy of BSC Diecasting & Finishing Ltd, is to assure the quality of the products and services supplied to customers and to ensure that the quality and regulatory requirements, are determined and satisfied, throughout all phases of contract performance.

High Pressure Die Castings are manufactured in Aluminium and Zinc also Plastic Injection Mouldings are manufactured to customer requirements in material to international standards. Machining and assembly of parts along with a range of plated or painted finishes are also offered as part of the service.

Continued supply and growth to current customers in the brewery trade, automotive market and hardware market are key to the business along with attracting new customers from existing or new markets.

The quality management system is subject to review leading towards continual improvement. Business objectives have been established and are reviewed on a regular basis to support the quality management system. Provision is made for the early detection of deficiencies, trends or conditions, that could lead to unsatisfactory product quality, and so enable the company to take effective corrective and preventive actions, which is both timely and effective.

Needs and expectations of interested parties are identified and are regularly assessed, to ensure the products and services provided are fully accepted by the management team with respect to business objectives.

The control of quality in our manufacturing systems, is vested in every employee and as such, collectively support the aim of the Company objective of the supply of Right First-Time products to agreed schedules.

We fully accept that the necessary resources will be provided to meet and maintain the system, processes and procedures issued to maintain a quality management system, that satisfies the requirements of our customers and other stake holders including such training or instruction, as may be required, to ensure competent personnel are employed at all levels to support the achievement of the Company objectives.
